ASIAN LONGHORNED BEETLE ADVISORY

This project falls within the Asian Longhorned Beetle (ALB) Eradication Program Regulated Boundary. Bidders should familiarize themselves with the ALB Factsheet, Federal Regulations, and the Animal and Plant Health Inspection Service (APHIS)/USDA website www.aphis.usda.gov. The following contract bid item may be affected by this condition: Item 102.1. It is possible that certain additional training & certification requirements and special disposal requirements will be required at a minimum. Bidders shall include any additional costs of compliance with city, state and federal regulations within the above bid items at this time.

Working in Massachusetts' ALB Regulated Areas APHIS has partnered with the U.S. Forest Service, the Massachusetts Department of Conservation and Recreation, the Massachusetts Department of Agricultural Resources, and the City of Worcester. Together, these organizations form the ALB Cooperative Eradication Program in Massachusetts. Both Federal and State law establish regulated areas around ALB infestations. The regulated areas assist in beetle eradication by curtailing the movement of materials that could host populations of the ALB. This keeps infestations from spreading. Federal and State laws outline the conditions and requirements for moving regulated articles out of or within the infested area. The Federal regulation can be found at 7 CFR 301.51. Training sessions, workshops, and other outreach tools designed to assist businesses with compliance are offered in the Worcester area to explain the ALB and laws enacted to eradicate it.
